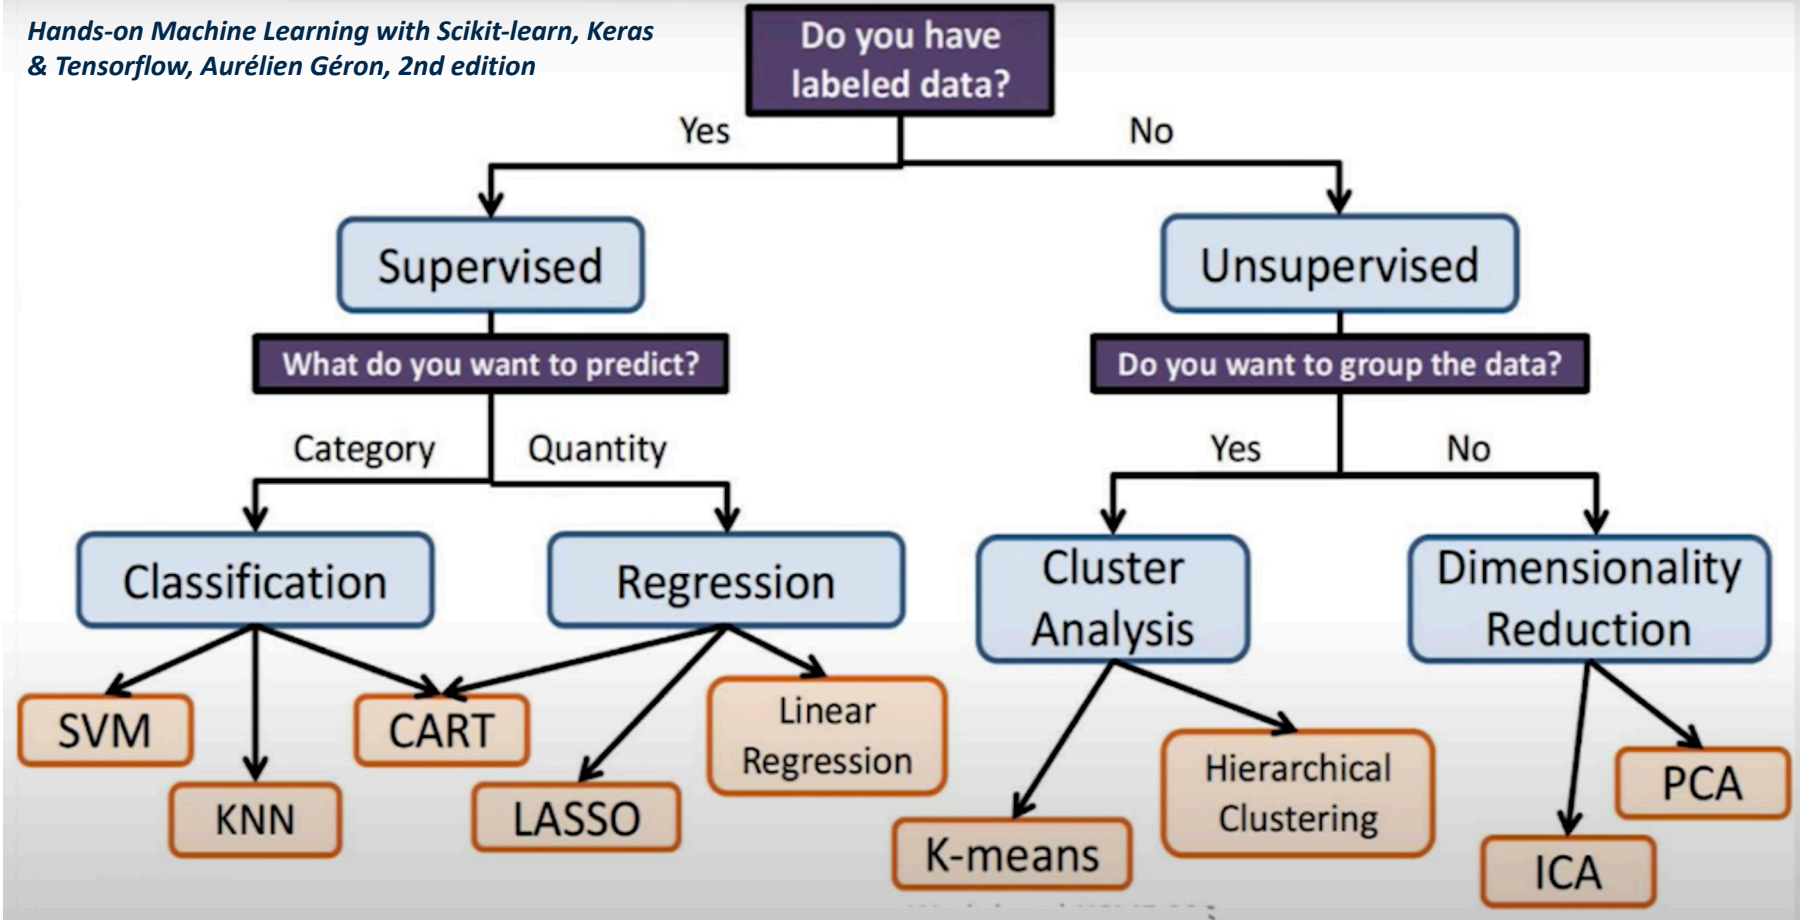
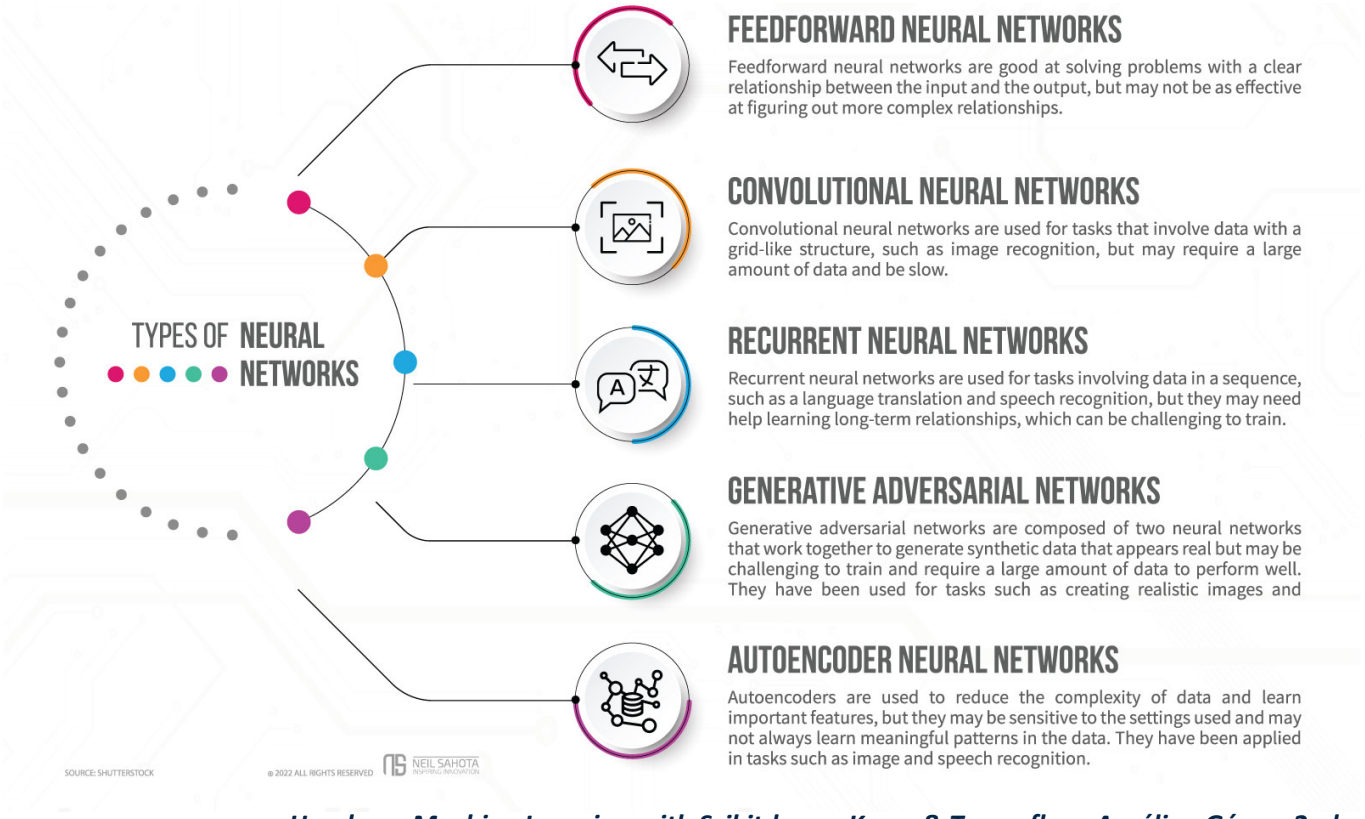
- RNN 
Hands-on Machine Learning with Scikit-learn, Keras & Tensorflow, Aurélien Géron, 2nd edition

The (« non-deep") machine-learning eco-system

Hands-on Machine Learning with Scikit-learn, Keras & Tensorflow, Aurélien Géron, 2nd edition



Main types of Deep Learning networks



Hands-on Machine Learning with Scikit-learn, Keras & Tensorflow, Aurélien Géron, 2nd edition

The laws of Machine Learning

1) Only use Machine Learning if the classical approaches fail to solve your problems.

2) A neural network can only produce outputs that resemble the data it was trained on.

3) Data preparation is the most important part of the machine and deep learning approaches.

Deep Learning with Python, François Chollet, 2nd edition

The biological neural network

Neuron

DRAGONFLY FREE 30-DAY TRIAL

Deep Learning for Imaging Scientists

This video provides the background details for a better understanding of Dragonfly's Deep Learning Tool and how to train deep models for denoising, image segmentation, and super-resolution. Topics include the comparison of image processing to linear regression, fitting and applying functions, perceptron and neural networks as functions, as well as model training and optimization.
